

Week 01 - HTTP, REST, and the Request/Response Cycle

Module: Foundations

Core Track

HTTP methods, status codes, headers, raw Node HTTP server, REST and CRUD.

Stretch Track

Content negotiation and correct 422 vs 400 vs 409 semantics.

Interactive Focus

Inspect traffic and repair a broken API specification.

Weekly Rhythm

Day 1: Concept + Live Build

Day 2: Lab + Pair Programming

Day 3: Review + Challenge

Deliverable

A working Node.js HTTP server implementing basic REST-style CRUD endpoints.
