

Week 02 - Express Fundamentals

Module: Foundations

Core Track

Routing, middleware, request parsing, error-handling middleware, project structure.

Stretch Track

Custom logging and rate-limiting middleware from scratch.

Interactive Focus

Build a four-endpoint Hello API and review middleware ordering.

Weekly Rhythm

Day 1: Concept + Live Build

Day 2: Lab + Pair Programming

Day 3-5: Review + Challenge

Deliverable

A structured Express API with centralized error handling.
