

Week 08 - Caching & Background Work

Module: Building Real APIs

Core Track

Redis caching, invalidation, Bull/BullMQ background work.

Stretch Track

Retry/backoff and cache stampede mitigation.

Interactive Focus

Load-test cached vs uncached endpoints.

Weekly Rhythm

Day 1: Concept + Live Build

Day 2: Lab + Pair Programming

Day 3-5: Review + Challenge

Deliverable

A cached API endpoint plus background job.
